

AU516 – Projet de Cursus

MANIPULATE THE ROBOTS

Robot access

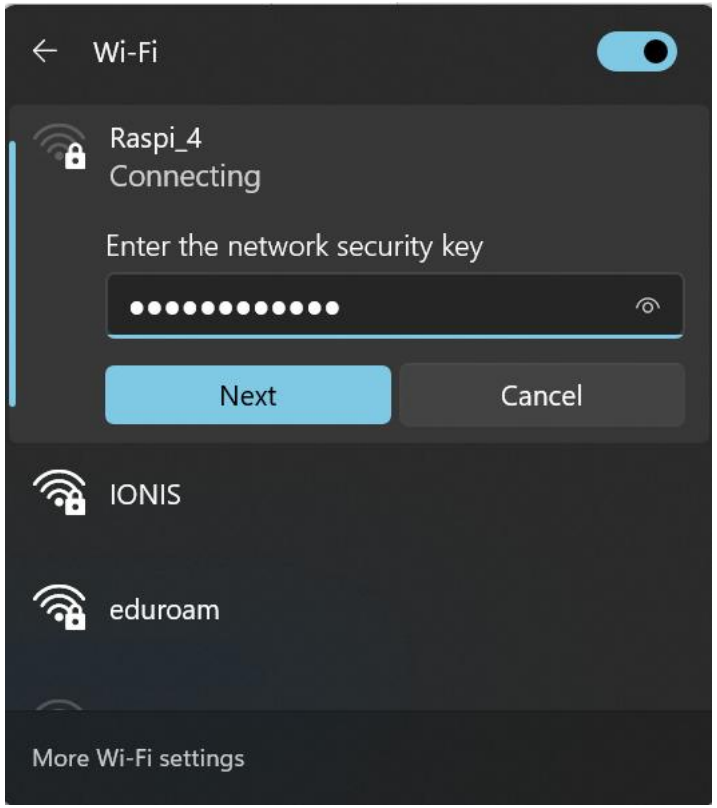

CONNECTION WITH SSH (IN A TERMINAL)

Step 1

- Turn on the Raspberry Pi.

- On your laptop, **connect to the WiFi network whose SSID contains the number of your robot.**

- WiFi password: **raspberrylab**

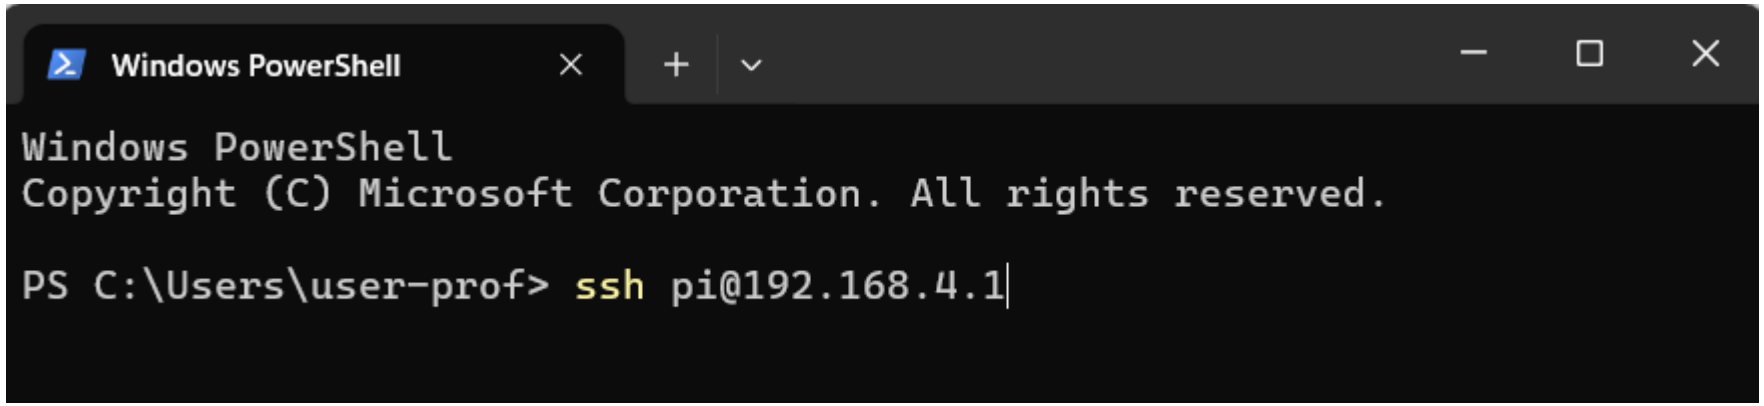

Step 2

- Open a terminal and run the following command:

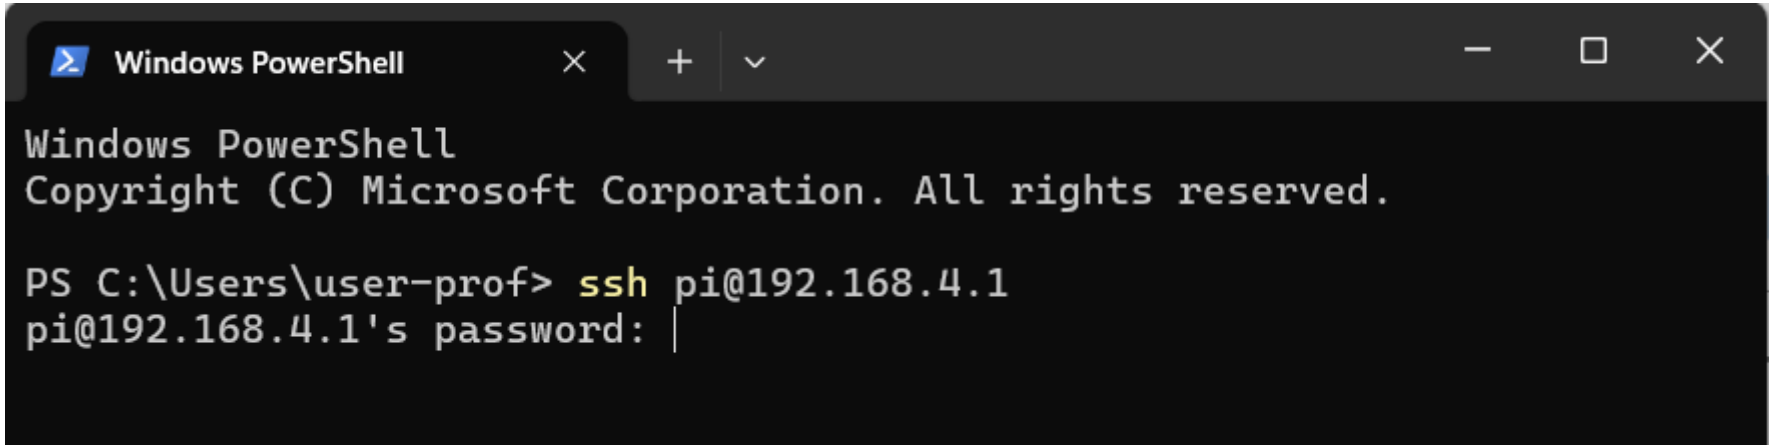

ssh pi@192.168.<robot number>.1

- For the first connection, confirm the ssh key creation (enter yes)

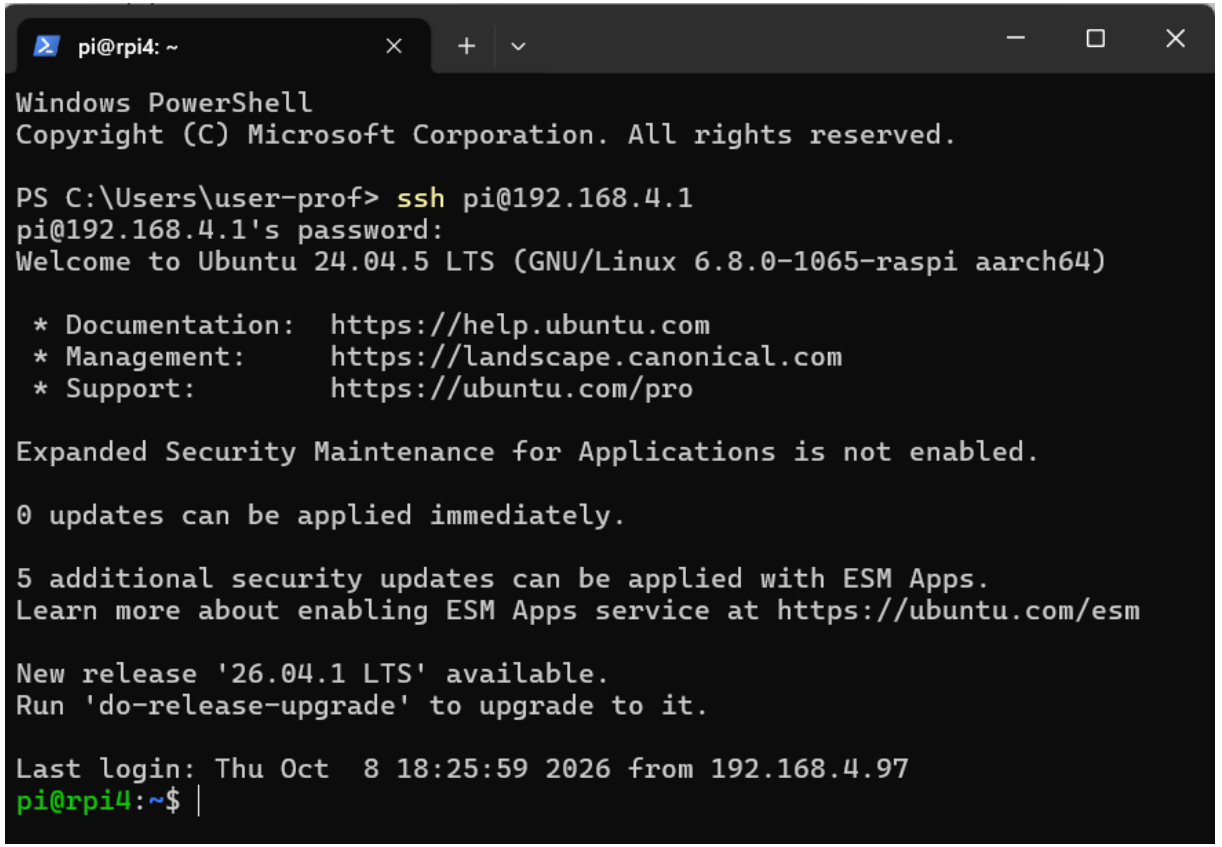

Step 3

SSH password: **Provided by the teacher**

Step 4

pi@rpi4: ~
Windows PowerShell

Programming

RASPBERRY PI 5 AND PICO W

RPi5 - Additional information

- To run a python script on Ubuntu 24.04 from a terminal, you need to use the following syntax:

python3 <filename>.py

- To **turn off** the Raspberry Pi, open a terminal and execute the following instruction:

sudo poweroff

Setup your laptop for the Pico

It is recommended to use Thonny to program the Pico W.
Here is a video that explains how to setup your laptop.
